11. VALDAR JAANUSSON: The Viruan (Middle Ordovician) of Öland . . 207
12. VALDAR JAANUSSON: Graptoloids from the Ontikan and Viruan (Ordov.) limestones of Estonia and Sweden . . . . . 289

## Note to libraries and bookbinders

The last volumes of this Bulletin have been distributed in four parts, each containing a varying number of articles, numbered and paginated in one series for the entire volume. Starting with volume XXXIX the Bulletin will be distributed in numbers with individual pagination, issued at irregular intervals. Title-page and table of contents will be supplied with the last number of each volume. The volumes will contain about 400 pages.

The Bulletin is distributed by the Uppsala University Library in exchange for foreign scientific periodicals. It is also obtainable through Messrs. Almqvist & Wiksell, Publishers and Booksellers, Stockholm.
